Travelling data

5

Data quality

6

Data in wireframes

CONNECT DATA REQUIREMENTS

1

What company data requirements do I need in my design to extend customer value?

- Design perspective

From data analysis for design to First-Time Right data quality in my design. How to do that?

– Design perspective

CONNECT DATA REQUIREMENTS

3

Is my design for a single application? Does front-end integrate company data requirements? Or do I need a data architect?

- Data perspective

CONNECT DATA REQUIREMENTS

4

Do I know the client's system landscape? Where will the data end up? How will that change my design?

– System perspective

CONNECT DATA REQUIREMENTS

5

Do business stakeholders have detailed data quality requirements? How do I use these in my design?

– Business perspective

CONNECT DATA REQUIREMENTS

Do I have access to standard company data definitions for my wireframe? (Find them in a data dictionary, directory or governance tool).

– Business perspective

And that's it!
